Infected Files :

- react-quill / quill
  - package.json — declares react-quill
  - vite.config.js — includes "react-quill" in optimize/ssr config
  - AdminTopics.jsx — imports ReactQuill and "react-quill/dist/quill.snow.css" and renders <ReactQuill />
  - package-lock.json — contains quill@1.3.7 as a transitive dependency
- glob
  - No project source file directly imports or requires "glob"
  - package-lock.json — lists node\_modules/glob (v10.x) as a transitive/dev-tool dependency (via fast-glob / chokidar etc.)
